

MOHAMMED ANSAR

Full-Stack Web Developer / Data Analytics Enthusiast

Mangalore, India | 9019715042 | iamanasarr15@gmail.com

[LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Aspiring software developer with hands-on experience designing and building full-stack web applications that solve real business problems, from billing automation to inventory management. Comfortable taking products from concept to deployment, with a strong focus on clean architecture, scalable systems, and intuitive user experiences. Currently pursuing a B.Tech in Data Science, combining software engineering skills with a growing foundation in data analytics.

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, React.js, Node.js, Express.js, HTML, CSS, R Programming

Database: MongoDB

Tools & Platforms: VS Code, Postman, Figma, Git/GitHub, Vercel

Core Concepts: Full-Stack Web Development, REST APIs, UI/UX Design, Data Analytics Fundamentals

PROJECTS

Bakery POS System — Team Lead

React.js, Node.js, Express.js, MongoDB | [Live Demo](#) | [GitHub](#)

- Led a team to design and build a full-stack Point-of-Sale (POS) web application for bakery businesses, built entirely from scratch, covering billing, order tracking, and inventory management.
- Developed a real-time billing module to automate the checkout and invoicing process, reducing manual calculation errors and speeding up order processing.
- Built an inventory and purchase-tracking system with low-stock alerts, giving business owners real-time visibility into stock levels and reducing the risk of running out of ingredients.
- Designed a dashboard to surface key business metrics such as revenue and order history, supporting quicker, data-informed decisions.
- Architected the front end in React.js and the back end using Node.js, Express.js, and MongoDB, and coordinated the team through design, development, and deployment on Vercel.

Interior Designers Website — Developer

React.js | [Live Demo](#)

- Built a responsive front-end website for an interior design business, showcasing services and portfolio work to attract and inform prospective clients.
- Used AI tools to generate design visuals and imagery for the site, speeding up the design process while maintaining a polished, professional look.
- Designed and deployed the site independently using React.js, with a focus on clean UI and easy navigation, hosted on Vercel.

EDUCATION

B.Tech in Computer Science (Data Science)

Yenepoya Institution | Expected 2028 | Currently in 5th Semester
